

ROHAN TARADE

SOFTWARE DEVELOPER

+91 8010739938 | rohantarade2004@gmail.com | [LinkedIn](#) | [GitHub](#)

OBJECTIVE

Computer Science undergraduate with hands-on experience in full-stack development and database systems. Skilled in Python, React.js, and Django, with a track record of building scalable web applications and data-driven solutions. Seeking a Software Developer role to apply strong programming and problem-solving skills to real-world engineering challenges.

EDUCATION

B.Tech in Computer Science & Engineering

2026

Arvind Gavali College of Engineering, Satara | CGPA: 7.8/10

EXPERIENCE

Python Full Stack Intern — Upskill IT Training & Placement

Feb 2026 – present

- Developed responsive web applications using Python, HTML, CSS, JavaScript, and React.js.
- Built backend functionality and integrated REST APIs for seamless frontend-backend communication.
- Worked with JSON and Git/GitHub, performing application testing, debugging, and troubleshooting.
- Collaborated on full-stack development projects following clean coding and version control best practices.

Python Full Stack Intern — Infosys Springboard (Project-based)

Feb 2026 – Apr 2026

- Engineered a parallel text-handling processor using Python, SQLite, and ThreadPoolExecutor, reducing processing time by 40% on large text datasets.
- Implemented threading and multiprocessing techniques, achieving a 2.5x speed-up over sequential execution.
- Built an interactive web application with SQLite database integration for a sentiment analytics dashboard, including search functionality, file uploads, and report generation.

SKILLS

- Languages:** Python, SQL, HTML, CSS, JavaScript
- Libraries:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
- Frameworks:** Flask, Django, React.js
- Tools:** Power BI, Excel, PowerPoint, Tableau, Git & GitLab
- Core CS:** Object-Oriented Programming, Data Structures, DBMS, Agile/Scrum Methodologies
- Soft Skills:** Report Building, Presentation, Leadership, Problem solving, Analytical Skills

PROJECTS

AI-Powered Smart Farming System

- Developed a machine learning-based crop and fertilizer recommendation system using soil, weather, and environmental parameters.
- Implemented and optimized ML models to deliver accurate predictions, achieving approximately 94% accuracy.
- Built and deployed the backend using Django REST API, enabling seamless model integration and data exchange.

Esport Management System

- Designed and developed a web-based platform using Django, Python, HTML/CSS, and JavaScript where players can apply for and host tournaments.
- Added role-based access control to handle different user functionalities such as tournament hosting, application review, and participation.
- Implemented secure user authentication, application management, and a user-friendly interface.

ACHIEVEMENTS & AWARDS

- Ranked top 2% in the Database Management System course (NPTEL – IIT Kharagpur), demonstrating strong DBMS expertise
- Ranked top 5% in the Machine Learning course (NPTEL – IIT Madras), demonstrating strong machine learning expertise.

CERTIFICATIONS

- Data Science with Python — NPTEL, IIT Madras (Feb 2024)
- Database Management System — NPTEL, IIT Kharagpur (Sep 2024)
- Career Essentials in Data Analysis — Microsoft & LinkedIn (Jan 2025)
- Introduction to Machine Learning — NPTEL, IIT Madras (Apr 2025)
